

DIFFUSION / GRILLES

CD-2000

Manufactured from fire retardant, V-Zero A.B.S. plastic, the CD-2000 diffuser is resistant to scratches, abrasions and fading. The injection moulding process eliminates all seams and joins giving an unsurpassed finish as the colour is "moulded in". By utilising high grade plastics we have been able to reduce the "cold bridging" effect of heat transmission through the diffuser. This is where a metal diffuser can condensate or "sweat" due to high humidity of some climates.

The unique snap-on adaptor system, available with or without balancing dampers and the simplistic "snap down" ceiling fixing clips can significantly reduce installation time. The bevelled edge profile of the CD-2000 blends in with all ceiling types, while the 1/2 tile commercial version comes standard to suit both imperial and metric T-Bar suspended ceilings.

Some of the features and benefits of the CD-2000 include:

- Manufactured from V Zero fire rated ABS
- Resistant to scratching and fading
- Minimises problems associated with cold bridging in high humidity areas
- Suits poly snap on adaptors
- Complies to AS1530.3 / AS1668
- For use in commercial, domestic and industrial applications
- Snap down clips for fast, safe installations. No tools required
- Two springs per snap down clip

Whether it is a high rise commercial building, a domestic dwelling in the suburbs or a small town house in the inner city, the CD-2000 will compliment any décor.

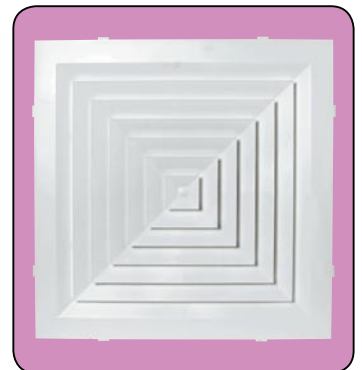

PRODUCT CODE	SIZE METRIC	SIZE IMPERIAL	PRICE
7220109	225 x 225	9 x 9	
7220112	300 x 300	12 x 12	
7220115	375 x 375	15 x 15	
72201595	595 x 595	N/A	

* Sizes listed are neck sizes except 595 x 595 which is the face size.

Code Prefix: 72201 Bevelled Edge
