

# DIFFUSION / GRILLES

## UNIVENT (CLASSIC AND FIXED)

The Univent Classic and Univent Fixed Blade have been used in Australia for a number of years and are regarded as one of the “choice” diffusers when making a decision in your HVAC requirements.

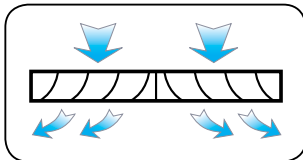

The entire Univent range is manufactured in H.I.P.S. and has a flexible edge so that it contours to your roof shape, great feature in older homes. The finish is etched to reduce reflection from lights etc and blend in more. Other features of the Univent Classic and Fixed Blade ranges are:

- Resistant to scratching and fading
- Quick Fit Fixing Clips supplied. No tools required
- Suits poly “snap on” adaptors
- Flush face finish (Fixed Blade)
- Adjustable airflow
- Adjustable Louvres (Classic)

The fixed blade version of the Univent can have the louvres pointing in either the up or the down position to suit the climate needs.

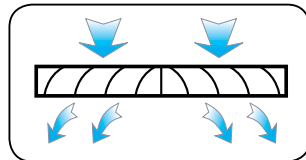

### Setting 1

For use with air conditioning systems the louvre panels are positioned to move the air at a shallow rate.

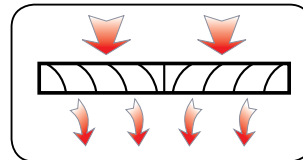

### Setting 2

In the case of high ceilings or use with an evaporative cooler the louvre panels should be inverted to achieve a deeper throw of air.

### Setting 3

For a downjet effect the louvre panels should be in the inverted opposing position. This works well getting warm air to the floor.

PRODUCT CODE UNIVENT CLASSIC	SIZE (neck)	UNIVENT CLASSIC PRICE
723009	9x9 (225x225)	
723012	12x12 (300x300)	
723015	15x15 (375x375)	
723022	15x22 (375x550)
