› Totem Pole Connecting System

The **Totem Pole Connecting System** provides air only to where & when you require it and is suitable for all types of heating, air conditioning and ventilation systems.

Save money on installation

The **Totem Pole Connecting System** saves on electrical wiring and installation costs by allowing localised grouping of poly motorised zone Dampers. With the addition of high quality, market leading name brand zone motors, costly motor breakdowns and call outs to electricians are a thing of the past. Combining streamlined, smooth & aerodynamic poly fittings with the best zone motors on the market, you can be assured of years of trouble free operation.

Peace of mind with brand names you know and trust

The zone motors supplied on Westaflex zone dampers are manufactured by highly respected and well known industry brands, Siemens and Honeywell. Both motors are backed with the a minimum 5 years Warranty (unlike the many “No Name” brand motors also on the market). Superior in quality and strength, both Siemens and Honeywell zone motors are available in 240 & 24volt options for total design flexibility.

Conserve energy whilst saving money on running costs & Improve comfort levels

To further maximise the energy efficiency of the **Totem Pole Connecting System**, manual dampers can be added for a minimal cost to maintain the exact amount of air required into each zone once zone motor is activated. The manual dampers will allow only the precise amount of air required to keep each area/zone of your home comfortable. Therefore otherwise wasted excess air is available to service other selected areas/zones of your home increasing the systems efficiency & saving you money on running costs.

› Zone Motors

Siemens 24 & 240 Volt
Honeywell 24 & 240 Volt

› Siemens Zone System

› Honeywell Zone System

› **Have Total Zone Control in your home with the Westaflex Totem Pole Connecting System**

› **Poly Motorised Zone Damper**

› **Uninsulated Poly Connector**

› **Totem Pole Connecting System.**
Utilising Poly Fitting, Poly Connector & Poly Motorised Zone Damper

a Motorised damper with positive shut off to supply with air only the areas / zones required.

b **Optional** - Manual damper blade set by installer maintains the exact amount of air required to service the area once zone damper is activated.

The simple yet effective design ensures:

For the Homeowner

- › Lower running costs.
- › Higher comfort levels.
- › Lower Greenhouse emissions.
- › High level of flexibility; zoning combinations are virtually endless.
- › High Quality zone motors with minimum 5 years Warranty.
- › Peace of mind with name brand motors you can trust.

For the Contractor / Installer

- › Maximum over all height (dependant on poly fitting used) less than 400mm.
- › Massive reduction in zone motor failure compared to “No Name” brands.
- › Reduces Installation time and faulty motor callbacks.
- › Allows the flexibility of combining most poly fittings to suit each individual install.
- › Eliminates wasted offcuts of ducting.
- › Reduced taping of duct (taping over all joins recommended).
- › Easy to transport, assemble on site, sub floor or in roof space.
- › Choice of 240 or 24v motors.
