

ZONING

HONEYWELL ZONESTAT™

The Honeywell Zonestat™ combines accurate temperature control with the latest technology in manual zoning, the Honeywell Zonestat™ lets you control the temperature in up to four areas (zones) of your home. Zoning enables you to reduce your energy costs and offers the additional benefit of helping to protect our environment. The Zonestat™ can be operated as a sophisticated “set and forget” 7 day programmable or a simple 24 hour thermostat. Other features of the Honeywell Zonestat™ include:

- Large LCD Screen
- Only heats/cools rooms YOU require
- Provides 240Vac control of Heat Pumps
- Manual or Automatic changeover
- Controls up to four 24-240Vac damper actuators
- Controller can be programmed for up to 3 periods per day in 24 hour or 7 day mode
- 3 speed fan control
- Lockable key pad

PRODUCT CODE	DESCRIPTION	PRICE
521Y7765A1008	User Interface (Wall Control)	
521W7765A1000	Indoor Control Board	

» ZONING

By satisfying the temperature requirements in only the occupied zones, your heating and cooling system does not need to run for long, unnecessary periods trying to control comfort levels throughout the whole house. Zoning your home saves you money by reducing the operating costs of your system.
